

# Interfacial Molecular and Electronic Structure and Dynamics

07/18/2016 - 07/22/2016

This is a workshop about water, interfaces, charges/surface potentials, membranes and membrane channels.

Note that we have a diverse audience and we must to allow ample time for discussion. As such, please prepare a talk that is **35 minutes MAX**. We know this is usually requested, and often ignored, but we plan to strictly adhere to this time limit at this workshop, to make sure we have at least 15 of lively discussion after each talk. Sometimes *less* is **MORE**.
